

South East London
Clinical Commissioning Group

Safeguarding Declaration

NHS South East London Clinical Commissioning Group (CCG) is collaboratively working with our local health partners across South East London to ensure safeguarding remains a priority during the current pandemic crisis. A key function of the South East London CCG is to have strategic oversight of safeguarding arrangements across the health economy.

The South East London CCG will respond and work with our partners to find alternative ways of working during this difficult time, working alongside services to ensure communication and the safeguarding statutory function is effectively maintained. The Borough Based safeguarding teams will continue to provide advice, and support to safeguarding colleagues working across provider services, monitoring and acting upon emerging priorities. The Designated Professionals are meeting regularly with providers, giving the opportunity to raise any issues and concerns, escalating to the South East London CCG Executive Lead for Safeguarding as appropriate.
