02 July 2020

Dear Colleagues,

**REQUIRES IMMEDIATE ACTION**

**Version 3 – Pan-London Symptom Control Medication Authorisation and Administration Record (MAAR) Chart**

Following the publication of the Pan-London Symptom Control Medication Authorisation and Administration Record (MAAR) Chart V2 on 23 June 2020, the End of Life Care Clinical Network team has been made aware of a formatting error.

The change relates to page 2 on the MAAR Chart titled “AS REQUIRED (PRN) SUBCUTANEOUS INJECTIONS AUTHORISATION AND ADMINISTRATION CHART” and has been rectified in Version 3.

The error occurred in the PDF writeable version. When the dose range section of the Nausea/ Vomiting box was typed into, the information recorded was also auto-populating in the dose range section in the Agitation/ Distress box. This could lead to errors and therefore has been rectified. We are sorry for any inconvenience this may have caused and would like to thank you for your continued support.

Please note there are no other changes to any of the other documents but for consistency we have updated all documents as Version 3.

Yours sincerely,

Dr L Caroline Stirling, MSc, PhD, MRCP, FRCP.  
Clinical Director, End of Life Care Clinical Network
