

SEL Digital Suite of Tools

Appendices

Appendix 1 - Financial Modelling and Funding Arrangements

We have completed financial modelling for each borough to ensure financial viability of chosen solutions. For clarity, the complete funding envelope consists of a combination of Digital First funding and 21/22 GPFV online consultation funding.

The Digital First programme will be funding the AccuRx plus offer which most practices are already utilising. The AccuRx patient triage feature, however, **will not be** included in the DSOT as other chosen providers offer a triage solution. We thereby avoid double funding where there is an overlap of coverage of features. If patient triage is required by boroughs, this will need to be locally funded.

We are negotiating SEL contracts for a period of 12 month, with a commitment to fund DSOT for three years. This is a flexible approach and that we will work with boroughs on future iterations of their DSOT. We are also trying to negotiate a standard reduced price for the AccuRx patient triage bolt on as part of our arrangements across SEL and if successful we will share this with boroughs.
