# PATHWAY FOR PATIENTS OFFERED COVID VACCINATION IN PRIMARY CARE

# Advice when inviting patients for COVID vaccination

Ask the patient if they are currently experiencing any COVID symptoms – cough, temperature, loss of taste/smell. If **YES** please **DO NOT** book them an appointment

Do not book vaccine appointment if:

- Had flu vaccine in last 7 day
- Already has appointment booked

Ask if patient:

- Do you have a have a history of severe reactions to medicines – requiring admission to hospital or injection (adrenaline)
- Are you, or could you be pregnant or breast feeding
- Are you on warfarin

if yes too any of above, refer to clinician for a conversation before booking

Advise patients

- This is a two-course vaccine, 12 weeks apart
- They may be asked to wait up to 15 minutes after the vaccination
- If they have disabilities that there will be wardens to help them on arrival at the vaccine centre
- When coming to the appointment please
  - Come alone unless they need the help of a carer
  - Please wear a face mask unless exempt
  - Wear clothing so we can easily get to the very top of your arm
  - Please don't bring bags/belongings unless necessary

# Template to support coding

You can capture the correct coding when inviting patients for COVID-19 vaccination using the template: **CES COVID Vaccination Invites in Primary Care** on your EMIS system.  
Please contact [succg.clinicaleffectiveness@nhs.net](mailto:succg.clinicaleffectiveness@nhs.net) for any queries.

# Search to identify patients to contact

We encourage practices to use the attached search to generate a report to identify patients to contact:

- Unvaccinated eligible patients
- Eligible patients who have not yet had 3 invites (including one letter)
- Eligible patients not contacted in the last 8 weeks

Patients who have received the vaccine will be removed from this search once the vaccination codes from Pinnacle transfer to EMIS

Patients will be included in the report if 8 weeks have passed since their decline or 3<sup>rd</sup> invitation (including one letter).

The report includes details of whether the patient has received text, telephone and/or letter invites.

**Patients left to contact – what's missing**

Parent Population: Exc 3 contacts  
Last Run: 25-Feb-2021 18:32 Relative Date: 25-Feb-2021 18:31
