

Pregnancy, fertility and COVID-19 vaccination

Monday 18th October between 6-7pm

A webinar and live Q&A covering fertility and pregnancy

- Dr Angela Bhan - Bromley Borough Director & Consultant in Public Health SEL
- Jacqui Kempen - Midwife and Local Maternity System Programme Lead, South East London
- Dr Ogechukwu Ilozue - GP Trainer, Partner and Clinical Advisor to London COVID-19 programme, North Central London
- Dr Gurjinder Sandhu - Consultant Infectious Diseases and General Medicine (King's College Hospital NHS Foundation Trust)

NHS

The COVID-19 jab can keep you, your baby and your loved ones, safe and out of hospital.

I am calling on pregnant women to take action to protect themselves and their babies.

Professor Jacqueline Dunkley-Bent
Chief Midwifery Officer for England

Understanding and voicing concerns about the vaccine. Managing worries that family and friends may have.

Understanding possible side-effects and risks.

Planning for future pregnancies.

Why getting the vaccine while pregnant is better for mother and baby than getting the vaccine after childbirth.

How many women have had the vaccine already and got pregnant?

What do I do if I feel unwell after having the COVID-19 vaccine?

When is the best time for me to have my vaccine while pregnant?

Where to look for reliable information on the vaccine? Being able to ask questions and speak with healthcare professionals if I have more questions?
