

Suspected COVID-19 - Assessment by GP

Clinical judgement is the most important factor

Always consider: is your patient at increased risk of severe illness from COVID-19?

Neutralising monoclonal antibodies and antivirals and are currently only for those patients in highest risk groups and eligible patients are contacted directly by GSTT following a positive test. If they have not been contacted within 24 hours, GPs can refer to CMDU via ERS. Please see separately sent communications for full details.

This guidance may change frequently.
