

# **Tell me more: south east London borough clinical and care professional leadership roles**

**10 March 2022**

# Introduction

- This pack provides a summary of the South East London borough and system wide clinical and care professional leadership roles available over the coming weeks.
- A clinical and care professional leader is someone who supports people to work together across organisations and professions to improve the health and wellbeing of people in their patch.
- There is no ‘right’ sort of clinical and care professional leader. We want a health and care system that values and draws on the skills of different and unique people.
- You’re likely to have some related experience. But whatever that may be - whether you’re a carer, social care practitioner, nurse, pharmacist, doctor, voluntary and community sector professional, expert by lived experience, allied health professional, psychologist, healthcare scientist, physician associate, public health professional or from another related background - you will care deeply about helping people lead happier, healthier lives.

## So how do I get involved?

- The next slide sets out the different areas boroughs are recruiting to. They range from *Learning disability and autism* to *mental health* to *patient and public engagement* and more. Boroughs are recruiting to these roles in different phases over the coming weeks.
- If you’re reading think ‘Is this really for me?’ please get in touch and find out more about specific roles, timelines and how to apply:

Bexley	Bromley	Greenwich	Lambeth	Lewisham	Southwark	SEL wide roles
